databases and software tools for electric power distribution systems have not been integrated and this leads to extra costs and restrictions imposed on utilities and other stakeholders for example distributed resource integration studies and modern grid technology assessments are more difficult and costly new vendors face high market entry barriers because it s necessary to interface with large and customized data systems at each potential utility customer this project promotes data and software tool integration through a set of data translators based on a common object model the data translators are delivered as open source software using appropriate software technologies the parties who benefit include electric utilities and their ratepayers researchers at government laboratories and universities small software companies wishing to enter the electric utility market and parties wishing to interconnect distributed generation to a utility system

lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the nasa scientific and technical information database

with about 200 000 entries starbriefs plus represents the most comprehensive and accurately validated collection of abbreviations acronyms contractions and symbols within astronomy related space sciences and other related fields as such this invaluable reference source and its companion volume starguides plus should be on the reference shelf of every library organization or individual with any interest in these areas besides astronomy and associated space sciences related fields such as aeronautics aeronomy astronautics atmospheric sciences chemistry communications computer sciences data processing education electronics engineering energetics environment geodesy geophysics information handling management mathematics meteorology optics physics remote sensing and so on are also covered when justified terms in common use and or of general interest have also been included where appropriate

this compilation probably looks like one of the craziest things a human being could spend his or her time on yet nobody would wonder at someone taking a short walk every day after twenty five years that person would have covered a surprisingly long distance this is exactly the story behind this list which appeared first as a few pages within the directory starguides or whatever name it had at that time and as a distinct sister publication since 1990 the idea behind this dictionary is to offer astronomers and related space scientists practical assistance

in decoding the numerous abbreviations acronyms contractions and symbols which they might encounter in all aspects of the vast range of their professional activities including traveling perhaps it is a bit paradoxical but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline they will probably encounter more difficulties when dealing with adjacent fields it is for this purpose that this dictionary might be most often used scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions

this brand new manual was written because of the increased use of chloramine as a residual disinfectant in drinking water distribution systems and the ubiquitous presence of nitrifying bacteria in the environment chapters cover background information on the occurrence and microbiology of nitrification in various water environments and provide current practical approaches to nitrification prevention and response this manual provides a compendium of the current state of the art knowledge however with quickly developing new advances in nitrification more writings will be forthcoming each chapter can be read independently

this book contains the lectures given in the international course improving efficiency and reliability in water supply systems hosted and sponsored by the menendez pelayo international university u i m p and co sponsored by aguas de valencia the british council and the ec cornett and erasmus programmes the short course took place in valencia spain in november 1994 with an attendance of more than one hundred delegates we must not only acknowledge and thank dr joaquin azagra as uimp director but also his collaborators d luis moreno and lidia lopez for their support in the preparation of the course and during the course taking place uimp sponsorship allowed us to assemble in valencia an eminent cadre of lecturers coming from all over the world that covered in an ordered and precise fashion some of the more relevant aspects on efficiency and reliability in water supply systems we are very thankful to all these leading lecturers for their invaluable cooperation the publication of this book and the spanish edition as well have been made possible thanks to the sponsorship of both polytechnic university of valencia throughout its chancellor justo nieto and aguas de valencia throughout its general director alvaro aguirre we must also thank kluwer academic publishers and especially their publisher petra van steenbergen for her assistance careful presentation and production of the book
